DamBuster Instructions

MANUFACTURED BY:
OMNI DISTRIBUTION, INC.
EXPLOSIVE PRODUCTS DIV.
WWW.OMNIEXPLOSIVES.COM

US PATENT NOS: D448,996, D455,962

PRODUCT WARNING AND DISCLAIMER

When mixed and unmixed, the OmniMAXX DamBuster is an inherently dangerous product. Improper use can result in serious injury or death to the user and/or bystanders. Omni Distribution, Inc. assumes no liability, expressed or implied, for the use or misuse of this device. Further, this product is to be considered a tool. As with any other tool, the success or failure of achieving the objective will depend on the skill and experience of the user. These instructions do not substitute for training; therefore, if you are not experienced with explosives and their use, do not attempt to use this product.

OMNIMAXX DAMBUSTER LOADING INSTRUCTIONS

The following is intended to be a step-by-step guide to arm the OmniMaxx Dam-Buster. *Note: The pictures you will see here are pictures taken in progression.*

Step 1.

Find one of each component: (Part 1 Solid), Part 2 (Liquid) and Part 3 (Activator.)

Step 2.

Carefully remove the lid from the Part 1 solid and the Part 2 liquid. Pour the liquid into the solid.

Step 3

Carefully open the Part 3 activator bottle and squeeze entire contents in the solid/liquid mixture. Replace the cap.

Step 4

Shake vigorously about 5 or 6 times until the activator is evenly distributed in the bottle.

OMNIMAXX DAMBUSTER LOADING INSTRUCTIONS

Step 5

Cut a length of 50 grain or higher deto-nating cord (det-cord). Thread the cord through the hole and tie a knot to secure it. Loop the det-cord completely around the bottle and tape to secure.

Step 6

Secure the det-cord with tape as shown and insert into pole. (Make sure to place the upper tape on the lid and not on the upper body as this will interfere with insertion into pole.)
